

— SINCE 1936 —

PILOT'S WATCHES

IN 1940, IWC DEVELOPED THE 52-CALIBRE T. S. C. BIG PILOT'S
WATCH WITH A CENTRAL SECONDS HAND

————— The first Special Pilot's Watch left the IWC factory in 1936. It was the start of a special relationship between IWC Schaffhausen and flying. Just four years later came the 52-calibre T.S.C. Big Pilot's Watch, the first observer's watch with a case measuring 55 millimetres in diameter. With its instrument-inspired appearance, it rapidly became a style icon and a model for all classic pilot's watches. Its design was to provide IWC with the inspiration for the Mark 11, produced from 1948 onwards. This, the best known of the Pilot's Watches from the Schaffhausen-based manufacturer, was originally built for the Royal Air Force and has been in constant use for more than 30 years. Since 1988, the IWC Pilot's Watch tradition has gone from strength to strength. In 2003, IWC launched the first Pilot's Watch series named after the legendary British aircraft, the Spitfire.

Since 2006, IWC has unveiled a series of Pilot's Watch special editions in honour of the outstanding books and life's work of the French author and pilot Antoine de Saint-Exupéry. His fiction addresses universal values such as friendship and humanity, and his best-known work, "The Little Prince", has ensured his great immortality.

In 2007, for the first time ever, a watch bearing the name TOP GUN joined the IWC Pilot's Watch squadron. In 2012, IWC's year of the Pilot's Watches, the TOP GUN collection established itself as an independent line within the Pilot's Watch family. For the first time ever, it included the Miramar models with their authentic military design.

In 2016, IWC's entire fleet of Pilot's Watches was given a thorough overhaul. The new Pilot's Watch collection, featuring many new timepieces with a range of innovative designs, sophisticated complications and top-quality materials, was warmly received by watch lovers.

The classic Pilot's Watches revert to something more closely resembling the historic original. The same applies to the TOP GUN models, which come with a surprise element in the form of embossed calfskin straps. The Pilot's Watch Automatic 36 is the

smallest model in the company's current line-up and was designed for anyone who prefers a slightly smaller and more discreet wristwatch.

The Pilot's Watch Timezoner Chronograph allows the wearer to select a new time zone using only the bezel: the hour hand, the 24-hour display and the date all advance or turn back automatically. Never before has there been a more simple, practical or elegant way to set a world time watch.

The launch of the new Big Pilot's Watch Annual Calendar Edition "Le Petit Prince" in white gold is also scheduled for 2017. Through the large sapphire-glass back, we see the little prince standing on his tiny asteroid – the rotor – and observing the blue sky. For the first time, IWC has blued the bridges and plates using a special process. The chronograph and Mark XVIII versions of these "Le Petit Prince" special editions are now also available with stainless-steel bracelets.

However, IWC is paying tribute not only to his world-famous work "The Little Prince" but also to the great humanist himself. A part of the proceeds from the unmistakable "Antoine de Saint Exupéry" special editions goes to the Antoine de Saint-Exupéry Youth Foundation.
